- Virtual Instructor-led Training (VILT)
- Assisted Self-paced Training (ASP)
- Certification (CERT)

TrueSight Orchestration: Essential Subscription – Administrators & Consultants

Subscription Overview

TrueSight Orchestration (formerly BMC Atrium Orchestrator)** is an IT process automation solution that allows IT to create workflows across applications, platforms, and tools to orchestrate critical activities such as event remediation, compliance, security and service desk automation across the organization.

****Note:** Starting with version 8.1.00 BMC Atrium Orchestrator product is now renamed to TrueSight Orchestration. This content is appropriate for all 7.x – 8.x versions and product names.

Using examples, demonstrations, scenarios and laboratory exercises the content of the online education subscription help you develop skills in TrueSight Orchestration installation, administration, and configuration and details the use of TrueSight Orchestration solution.

Note: This is an annual subscription and is regularly updated and changed, without notice, based on product updates, improvements, and additions. During the duration of the subscription, users will have access to the latest content without incurring additional fees or being subject to additional registrations.

Target Audience

Administrators

Consultants

Learner Objectives

Get familiar with the TrueSight Orchestration

Understand concepts and architecture of TrueSight Orchestration and its components

Learn to administer TrueSight Orchestration

Understand features and functionalities of TrueSight Orchestration

Learn to use TrueSight Orchestration effectively to increase efficiency of your business

Get certified to implement, operate and support TrueSight Orchestration

COURSE ABSTRACT

TrueSight Orchestration: Essential Subscription – Administrators & Consultants

SUBSCRIPTION ACTIVITIES

Demonstrations, Videos, Labs

ACCREDITATION AND CERTIFICATION PATHS

This subscription includes the full BMC TrueSight Orchestration Certification Path.

Offerings

WBT Course 1: BMC Atrium Orchestrator 7.x: Fundamentals – Part 1 (WBT)

Describe the purpose of BMC Atrium Orchestrator
Explain the functions of BMC Atrium Orchestrator
Identify the benefits of BMC Atrium Orchestrator
Recognize the components of BMC Atrium Orchestrator
Introduce Remedy Single Sign-On
Explain the purpose and functions of the Grid Manager
Navigate the Grid Manager
Describe the purpose and functions of Development Studio
Navigate and use Development Studio
Identify the Operator Control Panel

Navigate and operate the Operator Control Panel

WBT Course 2: BMC Atrium Orchestrator 8.0: Using New Features (WBT)

Introduce the new system adapter
Use RESTful API calls for managing peers and schedules
Introduce the dashboard enhancements
Introduce infrastructure updates and platform compatibility
» Introduce the Device operation added to the Microsoft System Center Configuration Manager adapter
Use the operations added to the Microsoft Active Directory adapter
Use the REST adapter
Introduce the HTTP adapter enhancements
Introduce the PowerShell adapter enhancements

Use the new AutoPilot OA Grid Management module

Introduce the common utilities to support the Tokenize Large String process

WBT Course 3: BMC TrueSight Orchestration 8.x: Fundamentals – Architecture and Components (WBT)

Describe the IT Process Automation
Describe the purpose of TrueSight Orchestration
Explain the functions of TrueSight Orchestration
Identify the benefits of TrueSight Orchestration
Describe the Architecture of TrueSight Orchestration
Recognize the components of TrueSight Orchestration
Explain the Operator Control Panel

COURSE ABSTRACT

Navigate and operate the Operator Control Panel

Execute Workflows from the Operator Control Panel

ILT Course 1: BMC Atrium Orchestrator 7.x: Fundamentals – Part 2

Reduce the risk of manual errors by automating basic IT tasks

Improve quality of IT service through the automation of common, repeatable tasks

Identify and configure the primary components of the BMC Atrium Orchestrator infrastructure

Identify the elements of the Development Studio

Create processes that invoke various base adapters

Transform data using XPATH

Use Context Item Variables

Identify advanced process activities including the switch and loop activities

Add Compensation to Workflow processes

Schedule job execution

Use the Debugger tool to test processes

ILT Course 2: TrueSight Orchestration 8.x: Fundamentals Administering

Explain the architecture of TrueSight Orchestration

Identify the components of TrueSight Orchestration

Configure modules and adapters

Execute workflows from the grid

Manage metrics and audit records

Use health and value dashboards

Understand the log files

Install and configure Remedy Single Sign-On (RSSO)

BMC Atrium Orchestrator 7.x: Fundamentals – Part 2 (ASP)

Reduce the risk of manual errors by automating basic IT tasks

Improve quality of IT service through the automation of common, repeatable tasks

Identify and configure the primary components of the BMC Atrium Orchestrator infrastructure

Identify the elements of the Development Studio

Create processes that invoke various base adapters

Transform data using XPATH

Use Context Item Variables

Identify advanced process activities including the switch and loop activities

Add Compensation to Workflow processes

Schedule job execution

Use the Debugger tool to test processes

Certifications:

BMC Certified Associate: Atrium Orchestrator 7.x Online Exam

The BMC Certified Associate: Atrium Orchestrator 7.x Online Exam will validate the competencies needed to successfully administer and operate TrueSight Orchestration
