

BMC Atrium Orchestrator 8.0: Using New Features (WBT)

COURSE ABSTRACT

COURSE CODE

» CLDS-AOUN-0800

APPLICABLE VERSIONS

» BMC Atrium Orchestrator 8.0

DELIVERY METHOD

» Web-based Training (WBT)

COURSE DURATION

» 3 Hours

PREREQUISITES

» *BMC Atrium Orchestrator 7.x: Fundamentals – Part 1 (WBT)*

Course Overview

BMC Atrium Orchestrator is the bridge between people, process, and technology. Orchestrator does not replace existing IT tools or the automation functions within these tools, instead, it integrates, plans, and orchestrates their actions. BMC Atrium Orchestrator replaces routine, error-prone human interaction, within and among the tools, with automation and built-in process measurements, giving you the necessary tools to continually assess and improve your automated processes.

The BMC Atrium Orchestrator 8.x: Using New Features (WBT) course familiarizes the learners with the enhancements that are incorporated in BMC Atrium Orchestrator 8.0 version.

This web-based course introduces the new features and functionalities in brief.

Target Audience

- » Administrators – IT Administrator
- » Designers – Process designers
- » Developers – Software developers

Learner Objectives

- » Introduce the new system adapter
- » Use RESTful API calls for managing peers and schedules
- » Introduce the dashboard enhancements
- » Introduce infrastructure updates and platform compatibility
- » Introduce the Device operation added to the Microsoft System Center Configuration Manager adapter
- » Use the operations added to the Microsoft Active Directory adapter
- » Use the REST adapter
- » Introduce the HTTP adapter enhancements
- » Introduce the PowerShell adapter enhancements
- » Use the new AutoPilot OA Grid Management module
- » Introduce the common utilities to support the Tokenize Large String process
